

Sparta designs Custom Organics Processing Systems ranging from bulky green waste pre-processing to refining compost and peat moss.

ORGANICS PROCESSING

With a rich history in designing and manufacturing a wide range of screens, including star, trommel, disc, and vibratory, Sparta provides turnkey systems for pre-processing green waste, (an)aerobic digestion and compost feedstocks; and fine-screening of mulch, compost & peat moss.

As a leading solutions provider and systems integrator, Sparta helps organics processors take their operations to the next level!

Feedstock

Screened fines

Finished product

Screened overs
