

Working with Sparta is like having your own in-house Engineering and Project Management Team... only better.

## C&D RECYCLING

Sparta's roots are in designing, building, and installing Construction & Demolition (C&D) recycling systems. Unlike other suppliers, Sparta selects and integrates the key processing equipment that best fits each system, depending upon waste composition, markets, and processing goals—even if they don't manufacture it.

## RESOURCE RECOVERY

As material recovery facilities look for cost (and space) efficient solutions with increasing flexibility, Sparta has answered the call. Sparta manufactures its own screening and separation equipment, conveyors, and steelworks; and integrates additional key components required for systems of all sizes. No project is too large or small to get the expert attention and interest it deserves!

## ORGANICS PROCESSING

Sparta has a rich history in designing and building rubber star and steel disc screens for processing mulch, compost, and peat moss. As a leading conveyor manufacturer and systems integrator, it's natural for Sparta to engineer, manufacture, and install complete organics processing systems.

## WHY CHOOSE SPARTA?

Some look to Sparta as the 'system experts', knowing that the Sparta team will not rest until the best layout is developed in a collaborative 3-D design process.

Others find Sparta refreshingly easy to work with, often feeling like Sparta's engineering & production team is *their* team for the project's duration.

And many simply trust that Sparta's industry veterans will find the best available technologies to optimize system cost, quality and performance based on their unique situation and goals.

Sparta enjoys working with customers who are equally passionate about their project's success.

# THE SPARTA WAY.

*Work with the team that's as committed to your success as you are—contact us today!*

**Passion.  
Expertise.  
Flexibility.**

Whether you think of Sparta as an engineering-based company with a manufacturing facility... or a factory that happens to have a deep engineering team, you're right either way!

Sparta manufactures all of the conveyors and steelworks in its turnkey recycling systems.

Not being tied to a full suite of products allows Sparta to sit on the same side of the table with its customers, and select the *best fit* processing equipment for each system.

*We don't believe any one company makes the best of everything... and we don't expect you to believe it either.*

Passion, Expertise, and Flexibility, define the Sparta Way.
